

Analysis of domestic solar power generation market

How much solar capacity did the US solar market install in 2023?

In 2023, the US solar market installed 32.4 GWdc of capacity, a remarkable 51% increase from 2022. This was the industry's biggest year by far, exceeding 30 GWdc of capacity for the first time.

How will the US solar industry perform in 2025?

Our latest five-year outlooks show the US solar industry will consistently install at least 40 GW dc per year from 2025 onward. This year, installations are expected to decline 4%, driven by a 2% decline in the utility-scale segment and a 19% decline in the residential segment. From 2025-2029, annual growth will average 4% for the entire industry.

What percentage of US electricity generating capacity is solar?

Solar accounted for 53% of all new electricity-generating capacity added to the US grid in 2023, making up over half of new generating capacity for the first time. The residential segment set another annual record at 6.8 GWdc installed in 2023, growing 13% over 2022.

How did the US solar market perform in Q2 2024?

In Q2 2024, the US solar market installed 9.4 GW dc of capacity, a record second quarter for the industry. While installations declined 21% quarter-over-quarter, they increased 29% from a year earlier. Solar accounted for 67% of all new electricity-generating capacity added to the US grid in the first half of 2024.

How did the US solar industry perform in 2023?

Overall, photovoltaic (PV) solar accounted for 53% of all new electricity-generating capacity additions in 2023, making up more than half of new generating capacity for the first time. Record-breaking 2023 to give way to strong growth in 2024 2023 was a year of recovery for the US solar industry.

How many GWDC did the US solar industry install in 2023?

The US solar industry installed 32.4 gigawatts-direct current (GWdc) of capacity in 2023, a remarkable 51% increase over 2022. This was the industry's biggest year by far, exceeding 30 GWdc of capacity for the first time. Every single segment set annual installation records except for community solar, which was within 5 MWdc of an annual record.

There is a clear growth trend that can be seen in the solar PV industry, and solar systems will become an integral part of our society and thus our environments. In this context, ...

Our latest five-year outlooks show the US solar industry will consistently install at least 40 GW dc per year from 2025 onward. This year, installations are expected to decline 4%, driven by a 2% decline in the utility ...

Analysis of domestic solar power generation market

Nigeria Power Market Analysis The Nigeria Power Market size is estimated at USD 391.69 million in 2024, and is expected to reach USD 483 million by 2029, growing at a CAGR of 4.28% ...

India Solar Power Market Size 2024-2028 The India solar power market size is forecast to increase by USD 792.5 billion at a CAGR of 52.07% between 2023 and 2028. In India, the solar power market is experiencing significant growth ...

NREL conducts analysis of solar industry supply chains, including domestic content, and provides quarterly updates on important developments in the industry. These analyses draw from data ...

As the largest developing country, China has formulated several encouraging policies to expand the market scale of domestic solar PV power generation since its formal large-scale launch in 2009, including promoting ...

The residential PV market shrank significantly in the first half of 2024, hurt by California's Net Energy Metering transition and high interest rates across the country. Analysts expect about 42 GW dc of U.S. PV installations for 2024, up ...

In 2023, the US solar market installed 32.4 GWdc of capacity, a remarkable 51% increase from 2022. This was the industry's biggest year by far, exceeding 30 GWdc of capacity for the first time. Solar accounted for 53% of all new ...

The global distributed solar power generation market size was valued at USD 109.92 billion in 2023 and is projected to reach a value of USD 182.73 billion by 2032, registering a CAGR of ...

The PV inverter market size is valued at US\$ 15.28 billion by 2024, from US\$ 41.87 billion in 2031, at a CAGR of 15.5% during the forecast period. PV inverters are critical components in ...

Solar energy cost analysis examines hardware and non-hardware (soft) manufacturing and installation costs, including the effect of policy and market impacts. Solar energy data analysis ...
