What are photovoltaic structures?

Photovoltaic structures represent the supports for photovoltaic panels. These photovoltaic panels can be with an aluminum frame with a thickness of between 30 mm and 45 mm, or photovoltaic panels with double glass without frames. Below are our structure systems available for ground-mounted power plants:

Why should I buy a black greenhouse?

It holds plenty of plants in the top and also stores my compost and pots underneath all hidden away for neat and tidiness. Very well designed and thought out and no glass to worry about. Very pleased. Buy Black Greenhouses online! Great Selection? Excellent customer service? Find everything for a beautiful home?

What is a vitavia Jupiter 9900 8 x 12ft black greenhouse?

Smartly designed with a stylish powder finish to an anodised aluminium frame, the Vitavia Jupiter 9900 8 x 12ft Black Greenhouse benefits from wide double doors that slide open to reveal a wonderfully large and light filled growing environment.

How do I choose a base frame for my greenhouse?

A powder-coated black steel perimeter base frame, suitable to install your chosen greenhouse onto. Base frames make installing your new greenhouse a whole lot easier, offering a durable flat surface and adds a few inches of extra height. A silver steel perimeter base frame, suitable to install your chosen greenhouse onto.

What is included in a greenhouse holder?

A Halls Popular Black 6 x 10 ft greenhouse comes with a pot holder that slots onto the frame, allowing pots with a 14cm diameter and up to 10kgs in weight to be held onto the frame. It also includes an internal thermometer for monitoring the temperature inside the greenhouse.

The frame includes the following: Bows (Hoops) - 1 3/8" Galvanized Steel Tubing (16 Gauge) Greenhouse bows are installed on 4" centers (every 4") 30" Ground Stakes to drive approximately 24" into the ground 1 5/8" Galvanized Steel ...

This greenhouse from Sol 72 Outdoor comes with an integrated tunnel and is composed of durable PE cloth over a high-quality steel pipe frame. Thanks to solar energy, it can maintain consistent temperatures that are ideal for plant growth. The durable PE cover protects the plants from rain, snow, and stormy weather, as well as pests.
