The company offers a range of energy storage solutions such as battery packs, and air-cooled and liquid-cooled energy storage systems to meet different requirements. The battery packs have a cycle life of more than 8000 cycles and an energy conversion efficiency of up to 92% and are suitable for residential, commercial, and industrial use.

Using a DC coupled storage configuration, harness clipped energy by charging the energy storage system's batteries with excess energy that the PV inverter cannot use. Given common inverter loading ratios of 1.25:1 up to 1.5:1 on utility-scale PV (PVDC rating : PVAC rating), there is opportunity for the recapture of clipped energy through the ...

The energy storage system is then charged directly with DC output power from PV modules, and the PV array and energy storage system do not require DC to AC conversion. Oversizing often occurs with DC-coupled systems which is when the amount of solar energy produced exceeds the system's inverter rating.
