However, installations of new battery capacity will outpace this growth. 22 GW of battery energy storage capacity is forecast to be operating in 2030. This means the proportion of battery capacity contracted in ancillary services will decrease from 85% in 2022 to 14% by 2030. Capacity Market

Capacity market revenues 8 oCurrent proposals are to create several derating factors for storage depending on duration for which the battery can generate at full capacity without recharging (from 30mins to 4h). Beyond 4h, derating factors would remain at 96%. oShorter-duration storage would be derated according to Equivalent Firm Capacity (additional generation capacity that would be

among others, pumped hydroelectric storage, compressed air energy storage, flywheels, and batteries. Storage can be located either in front of the meter (FTM) or behind the meter (BTM). FTM storage units are "in front" of a distribution utility's retail meter, meaning that the units generally transact solely in the wholesale markets.
