I will copy the same system on the Transit except for the panel will change from the 205 watts to a LG 300 watt panel. Same physical size panel just higher output.renogy RNG-100MB 4 Monocrystalline Solar Panels 100w ea. \$198 each, CTRL-MPPT40 1 Charge Controller 40amp MMP \$188, ...

how much of the roof you have unobstructed for panels. Without heroic measures (\$\$\$\$ highest-efficiency panels or exotic mounting) and roofspace completely dedicated to panels (no fans) I'd say ~1000w is a practical max. For people installing a roof vent and using normal panels 600w-800w is probably a reasonable target.

It was finally time to install the flexible panels from Link Solar. I chose the 135W version as its length (59.5 inch), did fit the width of the Ford Transit's roof exactly. ... ETFE Flexible Solar Panel Install on Ford Transit. by Beaker » Fri Nov 17, 2017 7:16 pm . Well done sir! I used 3M VHB tape to fix my solar panel on the roof too - it ...

So this was my solution to mount 2 380w solar panels responsibly. I was concerned with driving highway speeds and having one or both panels dismount and take out a whole family on the road. I have 2 roof vents already and conveniently the 2 panels fit between them with room to spare. Here is a shot of the sketchup model.

Keep the MC4 connections above the roof. Add a CB between the panel and the solar controller so you can turn off the solar panel power. Buy a MPPT solar controller. Single panel has high voltage and low amperage. The ...

An EV with solar panels is a good combination which can indeed provide free charging. That is, providing the owner has £11k to invest, a relatively large south facing roof, decent weather and a ...
