

Customized self-propelled solar panels

The Solar Trax 824 will lift panels 8" high and traverse 24" to handle most Solar Field designs. The base machine is track driven, providing the highest degree of traction and terrainability. Designed for rough terrains and increased slopes, the upper assembly will automatically level itself for increased stability and ease of panel placement.

Custom Solar Panel Shapes Use Space Less Efficiently. We are happy to make custom-shaped solar panels, but they will be more expensive per Watt and generate less power per area than rectangular panels. First, the cells on a non-rectangular panel will cover a lower percentage of the available surface area. If you look at this circular panel vs ...
