Bangladesh's Summit Group plans to invest \$3 billion in solar, wind and hydroelectricity generation projects in south Asia as a part of its clean energy push and efforts to diversify its fossil fuel-based business, its chairman said on Friday. Summit Power International, the Singapore-based holding company for all power generation assets of Bangladesh's ...

In this review paper, recent developments in the field of energy recovery from roads using solar panels, piezoelectric, thermoelectric and electromagnetic harvesters are discussed along with their efficiency, cost and field implementation. Moreover, new advancements in developing compatible energy storage systems are also discussed and summarised.

It takes renewable energy's share in power generation to around 3.5% of the country's average production of 11,000-14,000MW; for solar, the share is only 1%. Despite repeated calls by green groups at home and abroad to shift to clean energy, Bangladesh's initiatives to shift to renewable energy are sluggish.
