Why is the Zimbabwe Electricity Supply Authority in a financial quagmire?

This has severely eroded the power of local currency, leaving the Zimbabwe Electricity Supply Authority in a financial quagmire. They currently owe Eskom, South Africa's power utility, over \$33million. Because of these challenges, any drop in national production means the government has to ration electricity.

What if Kariba stopped producing power in Zimbabwe?

If Kariba stopped producing Zimbabwe would lose about 358 MW daily, that's about 300 000 homes without power. On top of this, Hwange colliery - which provides almost all of Zimbabwe's coal for power generation - is producing less because of old and deteriorating infrastructure.

Why does Zimbabwe owe Eskom \$33m?

For the past 10 years Zimbabwe has been going through a currency crisis caused by hyperinflation. This has severely eroded the power of local currency, leaving the Zimbabwe Electricity Supply Authority in a financial quagmire. They currently owe Eskom, South Africa's power utility, over \$33million.

Why is Hwange Colliery not producing enough power in Zimbabwe?

On top of this, Hwange colliery - which provides almost all of Zimbabwe's coal for power generation - is producing less because of old and deteriorating infrastructure. Currently Zimbabwe produces 1100 MW of power against a national demand of 1500 MW. This leaves a supply gap of 400 MW.
