Use these locking rods to replace or add to your shipping container door. Each locking rod includes the handle and top and bottom cams, mounting parts and cam locks (keepers) are not included. Call us today if you have any questions regarding our INSTA products.

How does a container End Lock work?

The first lock we'll cover technically isn't a lock by itself. The four lock rods built into every set of container end doors work by twisting in their mounts and engaging the cams with the keepers at the top and bottom of the container. Handles mounted on each lock rod allow owners to twist the rods in position.

What are storage container security locks?

The right storage container security locks are a crucial part of any shipping container door hardware inventory, and crucial to all door hardware designed for shipping. They are easy to install, and just as reliable as the rest of our shipping container parts. Our door hardware inventory has the reliable durable parts for your business.
