

# Energy storage electric heating brand

What is the best electric space heater?

Get the De'Longhi energy-efficient space heater at De'Longhi. The 1,500-watt Atomi tower space heater is ideal for folks who prefer to control the warmth in a room via an app. This efficient electric space heater has three power settings, a thermostat, a timer, and standard safety features.

Where can I buy an energy-efficient space heater?

Get the NewAir energy-efficient space heater at The Home Depot or NewAir. Micathermic heaters use a combination of convection and infrared heating to bring warmth to the room. During testing, this 1,500-watt De'Longhi model, set on high, raised the temperature in our 156-square-foot room by 5 full degrees Fahrenheit in 18 minutes.

Are space heaters Energy Star rated?

Space heaters offer a convenient and cost-effective way to improve home and office comfort. Personal and large versions increase the warmth in living spaces or offer temporary heat in a garage or a workshop. Since space heaters are not rated by Energy Star, shopping for the best model can be challenging.

What is the cheapest space heater?

We've been recommending the Lasko 754200 Ceramic Heaters since 2013, and it remains one of the cheapest and most reliable space heaters you can find. It warms up faster than most fan heaters we tested, and it has a compact, lightweight body (about the size of a loaf of bread) and can fit right under your desk.

What makes a good electric heater?

A good electric heater is easy to install, heats up quickly, and has adjustable temperature control. We researched and tested the top heaters for any home.

How much energy does a space heater use?

In a 15 x 10-foot room, it evenly raised the temperature by 5 degrees Fahrenheit on its highest setting, which was similar to the other space heaters we tested. Its energy use is average for a space heater too, at 0.27 kWh.
