

What is a lighting distribution box?

Our lighting lighting distribution box was the first and original 7-pole box on the market. This means the same product can be used whether the control you're looking for is a traditionally hard-wired 230V, 1-way wall switch or you need to deliver power and DALI from a centralised headend lighting control system.

How many outlets does a light distribution box have?

Each type of lighting distribution box is available with 2,4,6,8,10 or 12 outlets. All boxes have an additional outlet on one end. If the unexpected happens and you suddenly need extra capacity, then this socket outlet really comes into its own. Simply plug-in a Flex7 Expansion Box to instantly add up to 12 extra outlets.

Where are flex7 lighting distribution boxes made?

Flex7 Lighting distribution boxes are both designed and fully manufactured in the UK. This means that you'll never have supply issues, waiting for our products to be shipped in from abroad. Our lighting lighting distribution box was the first and original 7-pole box on the market.

How do I mount a lighting distribution box?

A supporting end bracket and fixing screw are also supplied for mounting the lighting distribution box's wiring compartment onto a standard conduit/BESA box. Flex7 Lighting distribution boxes are both designed and fully manufactured in the UK.

Why are flex7 lighting distribution boxes so popular?

With over 55,000 flex7 lighting distribution boxes installed every year there's got to be a reason they're such a popular choice. Every product in our vast range is carefully designed to ensure that it provides the best experience for the user. Our lighting distribution boxes are by no means an exception:

Are lighting distribution boxes BS 5733 compliant?

Boxes have a total rating of 16A so there's plenty of scope for reducing your on-site terminations to an absolute minimum and in turn speeding up the installation. At the very core of its design our Lighting Distribution Box fulfils the requirements of BS 5733.

Choosing a consumer unit, also known as a fuse box or distribution board, is an important decision for any homeowner or building owner in the UK. ... It is typically installed in a garage to provide power to electrical appliances, lighting, and other equipment. ... which indicates the amount of energy that the device can absorb before it fails.
