

Mining shovel has been the most critical equipment for high-efficiency production in open-pit mining, it adopts electric motor to drive hoisting and slewing system separately.

Thermochemical storage tanks store thermal energy as chemical bonds in a reversible reaction. When the solar collector heats up, it triggers a chemical reaction, storing the heat as a high-energy compound. When heat is required, the reaction can be reversed, releasing the stored heat. This technology is still under development but has the ...

Thermal energy storage tanks take advantage of off-peak energy rates. Water is cooled during hours off-peak periods when there are lower energy rates. That water is then stored in the tank until it's used to cool facilities during peak hours. This helps reduce overall electric usage by shifting a cooling system's power consumption from ...

Gravitational energy storage systems are among the proper methods that can be used with renewable energy. However, these systems are highly affected by their design parameters. This paper presents ...

Container lifting is a fundamental aspect of the global logistics industry, ensuring the smooth flow of goods across the world. To maximize efficiency and safety in container lifting operations, it is crucial to understand the various techniques, equipmen

Imagine a gigantic brick, packed full of compressed dirt. As big as a pickup truck but -- at 24 tons -- about five times heavier. An elevator powered by solar panels or wind turbines hoists it ...

of the hoisting motor and slewing motor, will greatly cut down the energy consumption and production cost of the shovel [1]. To recycle and utilize the gravitational and potential energy and kinetic energy of the shovel, the ultracapacitor energy storage mode and feedback grid mode are adopted in the shovel driving system. UTLT got its start with tanksand is specialized in the construction, maintenance and transportation of them ever since. Drawing on five decades of experience and numerous patents related to the lifting and storage of tanks, we have safely and successfully lifted more than 350 industrial-scale storage tanks throughout the Caribbean, South America, the US and Saudi Arabia.

Pumped hydro energy storage (PHES) has made significant contribution to the electric industry. Towards the improvement of this energy storage technology, a novel concept, known as gravity energy storage, is under development. This paper addresses the dynamic modeling of this storage system. A mathematical model is needed for describing the hydraulic ...

The invention discloses a hoisting system of an upside-down construction storage tank and a using method. The hoisting system comprises a storage tank wall plate and an expansion ring, the expansion ring right faces a groove, and an arc baffle in the groove can tightly abut against the storage tank wall plate; a combination supporting mechanism is further arranged on the ...
