Recently, flexible solar cells have experienced fast progress in respect of the photovoltaic performance, while the attention on the mechanical stability is limited. [3-10] By now, most reported flexible solar cells can only tolerate bending with curvature radius of several millimeters. The investigation on foldable solar cells is only a few.

Flexible Solar Panel Brackets that bolt onto vehicle roof racks and cargo racks. The thin film flex panels can be removed from the brackets in seconds for better efficiency. The solar panel Brackets have a low profile & aerodynamic design to reduce noise and drag. The bracket grips can be adjusted to eliminate solar cell shading.

The lightweight design of the Distributed Photovoltaic Bracket helps reduce the load on the roof, while using a convenient fixing method to simplify the construction process. The appearance of the bracket also needs to blend with the architectural style to maintain the overall beauty.
