Will China build 455 gigawatts of solar power in the Gobi?

China plans to build 455 gigawatts of solar and wind power generation capacity in the Gobi and other desert regions by 2030 as part of efforts to boost renewable power use to meet climate change goals, according to a document issued by National Development and Reform Commission and National Energy Administration in March 2022.

Where is Huawei's solar power station located?

In the Kubuqi Desert of Inner Mongolia, the State Power Investment Corporation used Huawei's smart PV solution to build a 300 MW solar power station. The power station located in Dalad Banner, an administrative region in Inner Mongolia, boasts 196,000 solar panels that were installed in the pattern of a galloping horse.

What is the Gobi Desert solar park?

The 2.2 gigawatt facility spans an area of over 25 square kilometers in the Gobi desert. This \$3 billion flagship project demonstrates the epic scale of renewable infrastructure developing worldwide. Traveling to the Tengger Desert Solar Park in northwestern China, rows upon rows of solar panels extend endlessly under the barren sky.

How much does the Gobi solar project cost?

The project, with total investment of more than 85 billion yuan (\$12.28 billion) and total installed capacity of 13 million kW, is the country's first in response to government ambitions to speed up construction of solar and wind power generation facilities in the Gobi and other parched regions amid efforts to boost renewable energy.

Can a photovoltaic power station be built in the desert?

"Building a photovoltaic power station in the desert is not easy, and requirement for solar equipment is higher due to the windy and sandy environment in the desert," Miao Ruijun, deputy head of Mengxi New Energy Dalad Photovoltaic Power Station in SPIC Nei Mongol Energy Co, told the Global Times at the site on Saturday.

How to manage a solar power station in the desert?

Miao noted that to better manage running of the station in the desert environment and save personnel needed onsite, it has adopted smart PV solutions provided by Huawei Technologies, including solar inverters, power carrier communication (PLC), intelligent IV diagnosis, as well as intelligent photovoltaic management system.

Aksu PV power station. map. Xinjiang. 160 : Qinghai Golmud Solar Park. map. Qinghai. 20.16 MW. 33.4 : 2011: ... Located in Datong City, Shanxi Province, it is the country's 3rd largest solar power plant. China's National Energy Administration aimed to install solar plants in this area. After successful completion of the project's 1st phase in ...
