

How long does the az meter store energy

Why do I need an energy meter?

It allows you to monitor your home's energy use. Combined with your aps.com account, your meter will give you all the usage information you need to make informed decisions and have more control over your energy bill. It also means you're wired for the future, so new innovations will be easier to add.

How much does a non-standard meter cost?

A monthly \$5 fee will be applied to your bill if you have a non-standard meter. The fee will be waived, however, if you live in a remote location where wireless technology is not available or automated equipment cannot otherwise be used. Residential customers with solar systems and business customers are not eligible for non-standard meters.

Why should you choose a standard meter?

It also means you're wired for the future, so new innovations will be easier to add. A standard meter lets you choose your service plan and participate in certain energy efficiency and solar programs, too. After we install a standard meter, there's no need for a visit from a meter reader. Everything is done remotely, safely and privately.

Do I need a meter reader after installing a standard meter?

After we install a standard meter, there's no need for a visit from a meter reader. Everything is done remotely, safely and privately. Our security methods are considered industry best practices and our meters meet all applicable government standards.

Do you have a standard meter or a non-standard meter?

While the majority of customers have a standard meter, a non-standard meter is available if you so choose. Non-standard meters require a utility worker to physically read the meter or must be specially configured, and there is a \$50 upfront fee per meter exchange.

A utility worker or contractor with a uniform and appropriate ID will replace your old meter with a new one in the same spot. If you have any questions about the worker or the meter, call the utility, at 1-866-368-8326, for ComEd, and 1-800-755-5000, for Ameren. The whole process should take about 10-15 minutes, and may include a brief interruption of your power.
