How do I activate all the energy storage terminals?

So, let's see what steps you need to take to activate all the terminals: Research Terminal #1: Take the first Energy Storage Device and move forward and to the right. You'll have practically no other options, so you'll know where to go right away.

How do you find the last energy storage device?

Place the energy storage device near it and break the second seal, which will open more paths. Once that is done, go back to your original spot to pick up the last device. After collecting the third energy storage device, go straight and turn left at the end. You will find the last research terminal near a broken mine car.

How do I open the energy storage warehouse in Genshin Impact?

To open the Energy Storage Warehouse in Genshin Impact, the main Core Gear Drive should point northwest. Remove the small Gear Drivetrain when it points inward, then run the main Core Gear Drive until it faces northwest. Once the Energy Storage Warehouse door is open, remove the Gear Drivetrain and move inside to install it.

Where can I find energy devices?

The starting point of the puzzle is at the entrance of the Geode Mine Shaft, where Caterpillar and Lanoire are standing. You can find one Energy Device on the left, which is hidden behind a Geode. There are two more Energy Devices--one in front and one on the right.

How do you remove energy storage barriers?

There are three barriers that players can remove in a specific order, which are right, left, and then the one in the middle. First, approach one of the Energy Storage Devices and press Pick Up. Quickly run straight ahead then turn right.

How do I repair the energy transfer terminal?

All energy collected will be transferred to the new terminal. To repair the Energy Transfer Terminal, you must use the Terminal's Viewfinder to collect and transfer energy from either the Fixed Storage or Energy Transfer Device. Fixed Storage and Energy Transfer Device Cipher Letters are also present in Genshin Impact's 4.1 update.
