

How to sell solar panel lights

Can you sell solar energy back to the National Grid?

Householders and businesses with solar panels installed, who generate more renewable electricity than they need, can sell energy back to the National Grid under the Smart Export Guarantee (SEG). An increasing number of people are now benefiting from this government-backed initiative, and you could be one of them.

Can you get money from solar panels?

As a homeowner with solar panels, you may be able to receive payments for any excess solar energy you send back into the grid. Since 2019, the government has backed various schemes to help those who produce renewable energy, to benefit from sending their surplus into the national energy supply.

How can a home owner make money from selling solar energy?

Earn money: Homeowners can earn money by selling back electricity to the grid in the UK through programs like the Smart Export Guarantee (SEG). **Reduced carbon emissions:** Selling excess solar energy back to the grid can help reduce the need for fossil fuels and decrease carbon emissions.

Should you sell unused solar energy?

Storing can lead to cost savings, increased energy independence, reduced carbon emissions, and improved efficiency. On the other hand, selling unused electricity can earn homeowners money, further reducing carbon emissions and contributing to grid stability. How do you Maximise your Solar Panel Renewable Energy?

Can you sell solar energy through SEG?

No, at the moment, the only option for homeowners is to sell excess solar energy back to the grid or store it using battery storage for future use. Are there special requirements to sell energy through SEG? Yes, The SEG requires your solar panels to be under 5MW capacity and you must have an MCS certificate for installation.
