

# Latest iraqi energy storage suppliers list

Which energy storage solutions will be the leading energy storage solution in MENA?

Electrochemical storage(batteries) will be the leading energy storage solution in MENA in the short to medium terms,led by sodium-sulfur (NaS) and lithium-ion (Li-Ion) batteries.

How has war affected Iraq's power infrastructure?

Despite the extraordinary challenges of war in recent years,Iraq has made impressive gains,nearly doubling the country's oil production over the past decade. But the turmoil has also undermined the country's ability to maintain and invest in its power infrastructure.

How much oil does Iraq produce a day?

It also takes a detailed look at the country's oil and gas sector,projecting that Iraq's oil production will grow by 1.3 million barrels a day by 2030,becoming the world's fourth-largest oil producer behind the United States,Saudi Arabia and Russia.

How can Iraq achieve a balance between oil and gas?

Striking the right balance Iraq is fortunate to have natural resources,but the historical dominance of oil and gas creates a challenge. Eliminating gas flaring and reducing methane emissions is a welcome first step.

Will Iraq's oil production increase if water availability increases?

One impeding barrier is the availability of water,as planned oil production will require a level of water production above what has been achieved so far. Assuming an increase in water availability,Iraq's production to 2030 grows by around 1.3 mb/d,making it the third largest contributor to global oil supply in that time.

What does KBR do in Iraq?

At KBR we have been working in Iraq since the 1970s,developing a local workforce,skilled in areas such as emissions reductions,gas monetization and green ammonia production. KBR's team in Iraq is composed of 50% Iraqi nationals. At the Majnoon Oil Field project for example,supporting the local workforce is a key priority.
