

The Ages-Old Annual Problem. Zimbabwe is currently facing severe and frequent power outages. According to the latest reports, Zimbabwe is only producing about 600 megawatts (MW) of electricity against a daily demand of about 2,000 MW. This means that many households and businesses must put up with 18 hours of load shedding daily.

Energy-Storage.news" publisher Solar Media will host the 8th annual Energy Storage Summit EU in London, 22-23 February 2023. This year it is moving to a larger venue, bringing together Europe's leading investors, policymakers, developers, utilities, energy buyers and service providers all in one place. Visit the official site for more info.
