

# Latest on the energy storage policy in poland

Will Poland have a power storage system?

The project has obtained the first license promise in Poland for electricity storage, PGE said in a press release. The storage system will be set up at the 716-MW Zarnowiec pumped-storage power plant with 3,600 MWh of storage capacity. The hybrid system will be capable of supplying power to about 200,000 households for at least five hours.

Does Poland have a good energy transition policy?

There is a strong policy focus on energy security and ensuring a just transition that maintains affordable access to energy and protects vulnerable consumers, while promoting economic growth. Poland has made notable progress on energy transition.

How will energy transformation affect the heating sector in Poland?

Furthermore, the energy transformation will lead to a reconstruction of the Polish heating sector through the use of renewable energy sources, gas sources, high-efficiency cogeneration, and in individual heating - abandoning the use of coal by 2040.

Will the capacity market kickstart the large-scale Bess market in Poland?

The capacity market is set to kickstart the large-scale BESS market in Poland by providing the basic building blocks of the business case, according to numerous delegates interviewed by Energy-Storage.news at Energy Storage Summit Central Eastern Europe (CEE) 2023 in Warsaw in September.

What happened at Poland's capacity market auction?

The results of Poland's recent capacity market auction have been revealed, with a clearing price significantly lower than the previous years and IPP Greenvolt saying it won the lion's share of around 1.7GW of BESS awarded contracts.

What is Poland's EPP 2040?

The EPP2040 is consistent with Poland's National Energy and Climate Plan for the years 2021-2030 (NECP, submitted to EC in December 2019), however, it also contains new goals, in particular regarding the limitation of coal use in residential sector and aimed at improvement of air quality.

It will have to build a completely new energy system over the next two decades. The new energy policy sets a cap of 56% for the share of coal in 2030 electricity generation, which is still very high compared to the rest of the EU. By 2040, the plan is to cut the share of coal in power to between 11% and 28%.

The Polish government will raise subsidy levels for rooftop PV and storage systems from December under its M&#243;j Pr?d scheme. The rebate for solar will increase from PLN 4,000 (\$888) to PLN 6,000 ...

# Latest on the energy storage policy in poland

The energy storage market in the Czech Republic - Jan Fousek, AKU-BAT. Issues: EU Policy on Increasing Flexibility in the Energy System; Energy Storage Strategy for the EU; Poland's Energy Storage Policy; Panel Discussion: With the explosion of new European markets in energy storage, most are driven by EU-directed programs and packages such as
