This literature review focused on battery pack disassembly through automatic machines, privileging robotic solutions. The interest in using robots for disassembly devices at their EoL has become increasingly important in the last few years []. Robotic disassembly involves several research topics such as Task and Motion Planning (TAMP), robot tool design, and ...

Prof. Dr.-Ing. Michael Sterner researches and holds courses on energy storage and regenerative energy industries at Regensburg University of Applied Sciences, and develops energy storage concepts for companies and municipalities. Together with colleagues, he previously launched the Power-to-Gas storage technology, which remains his chief research interest.
