

Luxembourg city finnish energy storage subsidy

Is Luxembourg ready for a low-carbon economy?

Luxembourg is targeting a sharp reduction in emissions by 2030, but new measures are needed to boost investment in renewables and energy efficiency, new IEA report says. The International Energy Agency released its latest in-depth review of Luxembourg's energy policies today, welcoming the country's ambitions to shift to a low-carbon economy.

Does Luxembourg need a new electricity infrastructure?

Luxembourg aims to cover over a third of 2030 electricity demand with renewables, mostly through variable renewable energy (VRE) from PV and wind generation. The share of VRE generation in imported electricity is also expected to increase significantly. Taken together, these factors will require substantial investment in electricity infrastructure.

What are Luxembourg's Energy Policy Priorities?

Since the 2014 IEA review of Luxembourg's energy policies, the country has made progress on its energy sector priorities of ensuring security of supply, promoting energy efficiency, increasing the use of renewable energy and reducing greenhouse gas (GHG) emissions.

Is Luxembourg ready to achieve its energy goals?

"The IEA is ready to support the government's efforts to achieve these goals, starting with the recommendations contained within this report." The report notes that Luxembourg faces challenges in achieving its energy objectives. The country's energy supply is dominated by fossil fuels, and carbon dioxide emissions are rising since 2016.

What is Luxembourg doing about energy security?

Luxembourg is also actively cooperating with neighbouring countries on energy security and is planning to strengthen its electricity grid to support additional imports and domestic renewable generation.

Why does Luxembourg have a low energy cost?

The low costs of energy in Luxembourg and the high purchasing power of its residents represent a significant barrier to achieving the energy sector targets. Low taxes result in low electricity, natural gas and heating oil prices providing little incentive to invest in renewables and energy efficiency.

At the beginning of the year, all renovation subsidies were increased to a maximum of 62.5% of the costs excluding VAT (previously the limit was 50% of the costs excluding VAT). The only exceptions to this are subsidies for energy consulting and support for individual renovation measures, which remain unchanged.

The subsidy is available to natural persons who reside in Luxembourg, for their personal needs, whether they
