Shared energy storage offers investors in energy storage not only financial advantages [10], but it also helps new energy become more popular [11]. A shared energy storage optimization configuration model for a multi-regional integrated energy system, for instance, is built by the literature [5]. When compared to a single microgrid operating ...

Studies have been carried out regarding the roles of ESSs in providing bulk energy, as well as in energy transmission, energy distribution, ancillary services, and energy management [9, 10]. A report by Bloomberg New Energy Finance (BNEF) predicts that by 2030, the global installed ESSs capacity is expected to grow 2.6 times greater
