

National Development and Reform Commission Poverty Alleviation Solar Power Generation

What is the work scheme on photovoltaic poverty alleviation project?

In 2014, the National Energy Administration and the State Council Poverty Relief Development Leading Group Office jointly issued The Work Scheme on Carrying out Photovoltaic Poverty Alleviation Project, dedicated to launching a nationwide PV poverty alleviation pilot project.

What are photovoltaic poverty alleviation projects (PPAPs)?

Photovoltaic poverty alleviation projects (PPAPs) 1. Introduction With the increasing consumption of fossil energy and changes in the ecological environment, it is of increasing significance to meeting the energy demands required for industrial and economic development with clean and efficient power generation .

Can solar power help reduce poverty in China?

Solar photovoltaic (PV) power project, one of the major targeted poverty alleviation programs in China, has contributed greatly to the country's poverty reduction efforts, according to a white paper released by the State Council Information Office on April 6.

What are China's photovoltaic poverty alleviation projects?

China's photovoltaic poverty alleviation projects (PPAPs) aim to help alleviate poverty by using the new energy power generation. In recent years, the PPAPs have flourished with the strong support of the Chinese government, becoming an integral strategy for the support of rural industries.

Is photovoltaic-based targeted poverty alleviation the ten large-scale poverty relief programs?

Photovoltaic-based targeted poverty alleviation has been designated as one of "the ten large-scale poverty relief programs" in China. In spite of remarkable achievements, a number of issues still need to be addressed.

Do solar photovoltaic projects improve poverty alleviation?

There lacks a comprehensive analysis on the large-scale deployment of solar photovoltaic projects and its impact on poverty alleviation. Here the authors show that solar photovoltaic poverty alleviation pilot policy increases per-capita disposable income in a county by approximately 7%-8%.

3.1 Research questions and scientometric analysis. Currently, it is a common view that with increasing income per capita and decreasing poverty, there is a growing need for excessive energy-intensive products for human and economic activities (Balsalobre-Lorente et al., 2023). The application of solar technology has received an exceptional focus from ...

China's National Development and Reform Commission divides solar resources into three categories based on the annual equivalent utilization hours of PV: Type I (above 1600 h), Type II (1400-1600 h), and Type III

National Development and Reform Commission Poverty Alleviation Solar Power Generation

(1200-1400 h) with different feed-in tariffs (FIT). Henan province belongs to Type III, with the weakest solar radiation.

The National Development and Reform Commission conducted tests on several PV power stations, and the results show that after 2-3 years of operation, the module attenuation rate for some sizable PV ...

Poverty eradication is the first goal of the UN-defined Sustainable Development Goals (SDGs). By the end of 2013, China has completed the registration of the poor population nationwide and identified 128,000 impoverished villages, 30 million poor families and 70 million people (Zhou, Guo, Liu, Wu, & Li, 2018; Liu et al., 2016) in a takes the elimination of poverty ...

With imbalanced economic development among different regions, China's impoverished population reached 55.75 million in 2015. In order to enhance the annual income of impoverished people to over 3000 RMB per capita, the specific poverty alleviation fund provided by the central government in 2016 was raised to 67 billion RMB [1]. Helping the rural poor ...

Numerous scholars have also evaluated PV poverty alleviation policies to better guide their implementation. For instance, a study in China found that in the process of implementing PPAP, it is ...

The National Development and Reform Commission (NDRC) is a ministerial-level department of the State Council. The NDRC implements the CPC Central Committee's policies and decisions on development and reform, and adheres to and strengthens the party's centralized and unified leadership over development and reform in the process of performing its duties. The main ...

In the same year, the "Opinions on the Implementation of Poverty Alleviation by Photovoltaic Power Generation" and the "Thirteenth Five-Year Plan" for Sustainable Energy Development were released (General Office of National ...

Poverty alleviation and environmental improvement are two important targets which most developing countries try to achieve. In order to promote the poverty alleviation by using clean energy sources, this paper develops a joint poverty alleviation project including the green energy investment company (GEIC), solar photovoltaic (PV) power plant (SPP) and ...
