Petroleum Development Oman - PDO. 26m dia (Capacity : 3000m³) water tank installation in Ras al Hamra Infrastructure Development Project ... Al Dhakhliya Water Transmission System Phase II Project. PDO. Super Duplex Piping Works Tasnim Misfah Workshop ...

The project includes laying pipelines with a total length of about 140km in addition to establishing three pumping stations with an operational capacity of up to 238,000 cubic metres per day from the new water pumping station in Barka towards the main reservoirs in the Oman Logistics Zone and the reservoirs of the wilayats of Barka, Suwaiq ...

The Ministry of Agriculture, Fisheries and Water Resources (MAFWR) announced that it will open the Wadi Dayqah Dam gates to discharge 15mn m³ of water on September 15, 2024. Located in Quriyat, 75km from Muscat, Wadi Dayqah is home to one of the largest dams in the Arabian Peninsula.

In July 2018 the opening of Oman's largest seawater desalination plant on the coast west of Seeb marked a major step forward for the water utility sector. Completed in less than 30 months at a cost of \$300m, the Barka IV independent water project (IWP) has a ...

By combining the direct air carbon capture technologies of Climeworks with the domain expertise of 44.01 in decarbonisation, the partnership aims to unlock the massive CO₂ storage potential of Oman. "We are excited to explore the potential to store CO₂ from Climeworks" direct air capture in Oman together with 44.01.

RIMA PRODUCED WATER TREATMENT FACILITY was constructed to treat the oil produced water from the rigs with microbes. Spanning an area of 3 Million Square meters, the project consisted of Advanced earthworks, mechanical works and concrete structures. Total area developed - 3 Million Sqm. 200 m Diameter hexagonal reservoir, 6.5 km of retaining dam.

Barka, one of Oman's largest water production hubs, is home to a number of water schemes that supply potable water to large swathes of northern Oman via the country's integrated water grid. This capacity is being further augmented with the addition of Barka V IWP, a 100,000 m³/day capacity scheme currently under construction by a ...
