Duke Energy (NYSE: DUK) today provided an update on its strategy to meet customers' need for affordable, reliable and increasingly clean energy. The company's planned investment of \$145 billion over the next 10 years for critical energy infrastructure is essential to meeting these customer needs and achieving net-zero carbon emissions by 2050 while also ...

Duke Energy operates two pumped-storage plants - Jocassee and Bad Creek. Pumped storage can be employed to capture unused electricity, like that from non-dispatchable renewables like solar, during times of low use. This ability to capture unused electricity, then use that stored energy, helps us minimize carbon emissions created by other ...

The world shipped 143.8 GWh of energy-storage cells in the first three quarters of 2023, with utility-scale and C& I accounting for 122.2 GWh and residential and communication energy storage for 21.6 GWh, according
