Which solar inverter should I buy?

Every solar panel system needs some kind of inverter, and we've compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick.

Are solar inverters expensive?

They're good at dealing with shade (like power optimizers), and have the additional advantage of making your solar system easy to expand. They are, however, the most expensive type of inverter. Learn more: Inverter types compared The solar inverter you choose will need to be compatible solar system type you are installing:

How long does a solar inverter last?

One of the more expensive inverters on the market but still lasted only one year. Find the best solar inverter for your home based on expert and consumer reviews. Inverters maximize solar panel output and convert power from DC to AC, making them an integral part of home solar power systems.

What is a solar inverter?

A solar inverter is an essential part of a solar-panel system. The inverter turns the direct current (DC) electricity generated by solar panels into the alternating current (AC) electricity needed for most appliances and home electrical needs.

How do I choose the right solar inverter type?

There are two categories to consider when deciding on the right solar inverter type: the solar inverter technology, and the type of solar power system the inverter is for. String inverter: A string inverter is a single, standalone unit that converts power from a whole string (or strings) of solar panels.

What are the different types of solar inverters?

When it comes to home solar installation, homeowners have three types of solar inverters to consider: string inverters, string inverters with DC power optimizers and microinverters. Each inverter setup comes with upsides and downsides. Here's what you should know.
