Xiamen Art Sign Co., Ltd. was established in 2006, specializing in the design, production and sales of photovoltaic mounting systems and related solar accessories. Till now, we has been exported to more than 60 countries around the world. Qualified PV mounting system suppliers need to consider the following issues in the de...

The omnidirectional photovoltaic tracking bracket system is a complete set of patented solar power generation products developed and designed by Weineng Smart Energy for the construction of photovoltaic and photothermal power stations, which is disruptive, stable in quality, and fills market gaps. This product adopts vector drive technology to ...

As the world's leading manufacturer and solution provider of photovoltaic brackets and BIPV systems, Shielden has been deeply involved in a segment in the middle reaches of the photovoltaic industry chain - brackets for 14 years, firmly occupying a place in the global photovoltaic industry. Its representative product tracking bracket system has ...

The global economic development has been restricted by traditional energy sources, which are exhaustible and not environment-friendly. Converting solar energy to electricity is one of the most effective and sustainable approaches to solve above issue. In recent years, rapid advances in photovoltaic (PV) technologies reduce the PV module cost.

The Distributed Photovoltaic Bracket is a bracket structure specially used to install and support distributed photovoltaic systems. It is designed with a focus on flexibility, lightweight and safety . This kind of bracket needs to adapt to various roof structures, including flat, inclined, curved, etc., to ensure stable installation of ...
