Does proficad support photovoltaic circuit diagrams?

ProfiCAD supports the drawing of photovoltaic circuit diagrams. In addition to the common electrical engineering symbols, the library includes symbols such as solar cells, photovoltaic panels, solar collectors, inverters, etc. Should you need more symbols, you can create them in the symbol editor. Some sample drawings (click for full size):

How do I download a DWG file?

DWG format available upon request. Right click and 'Save As...' to download the DWF file.

How much space does a photovoltaic system need?

Photovoltaic modules installed on the ground or on a flat surface occupy an area of approximately 20 m<sup>2</sup>/kWp, avoiding shading between the rows of modules. The design of a photovoltaic system, from the public operator's network to the photovoltaic modules, requires careful planning and compliance with local regulations.

How much space does a photovoltaic module occupy?

Photovoltaic modules installed on a sloping roof or facade occupy an area of approximately 8 m<sup>2</sup>/kWp. Photovoltaic modules installed on the ground or on a flat surface occupy an area of approximately 20 m<sup>2</sup>/kWp, avoiding shading between the rows of modules.

A trusted leader in solar PV mounting systems. Designing, manufacturing and supplying. Since the incorporation of SUNFIXINGS in January 2011, we've strengthened our presence in the solar industry as a trusted leader in designing, manufacturing and supplying quality solar PV mounting systems. Through our continued flexibility and innovation ...

Pole mounted solar panels are affixed atop tall poles, elevating them above the ground. This mounting technique offers several advantages: it allows panels to capture sunlight above potential ground-level obstructions, provides natural cooling due to increased airflow, and utilizes vertical space. Pole Mounted Solar Panels are commonly available with one to four ...
