Does proficad support photovoltaic circuit diagrams?

ProfiCAD supports the drawing of photovoltaic circuit diagrams. In addition to the common electrical engineering symbols, the library includes symbols such as solar cells, photovoltaic panels, solar collectors, inverters, etc. Should you need more symbols, you can create them in the symbol editor. Some sample drawings (click for full size):

Which CAD drawings are presented in plan and in elevation view?

These CAD drawings present the views in both plan and elevation. They are for aluminum free standing construction for installation solar panels.

How much space does a photovoltaic module occupy?

Photovoltaic modules installed on a sloping roof or facade occupy an area of approximately 8 m²/kWp. Photovoltaic modules installed on the ground or on a flat surface occupy an area of approximately 20 m²/kWp, avoiding shading between the rows of modules.

How much does a solar panel weigh?

Weight of solar panels: PV16-M10=25kg Where the panels are fitted into a pitched tiled roof, they are fixed directly above the roof battens with a uniformly distributed load of 12.8 kg per m². Roof structure modifications are unlikely to be necessary, as this is less than the weight of the replaced roof covering. Details of flashing-fixing see sheets 3 to 6. Redline shows approximate extent of tiles.

How much space does a photovoltaic system need?

Photovoltaic modules installed on the ground or on a flat surface occupy an area of approximately 20 m²/kWp, avoiding shading between the rows of modules. The design of a photovoltaic system, from the public operator's network to the photovoltaic modules, requires careful planning and compliance with local regulations.

A durable, 2mm thick stainless steel bracket enable secure and easy installation of photovoltaic panels on a Metrotile roof system. The brackets have been specially designed to be screwed into the rafter centres and sit between the lapping tiles without kicking-up the tiles; reducing the need to screw through the tiles, invalidating the guarantee.
