

How do I know if a solar salesperson is fraudulent?

Select one of our top three recommendations from the panel below to get started on your solar journey safely: High-pressure sales tactics, exaggerated promises and claims of "free" solar panels are three major red flags to look out for when determining if a solar salesperson is fraudulent or misleading.

How do I avoid a crappy solar panel deal?

To avoid a crappy solar panel deal, watch out for these scammy sales tactics. Dealing with door-to-door salespeople is annoying, no matter what they're selling. But the solar industry is full of bad actors, with solar salespeople knocking at your door with misleading offers and overpromised savings.

What if a solar installation is not a good idea?

Unscrupulous solar companies may employ aggressive or dishonest sales tactics to close deals quickly, especially if the proposed solar installation isn't in your best interest. These tactics can include: Be cautious of any salesperson who uses these tactics or seems unwilling to provide detailed information about the proposed solar system.

Are solar leases and PPAs a good choice?

Solar leases and PPAs are a good choice for some people, but you have to be very careful when vetting a company that offers these methods of third-party ownership. The contracts often last for 20 years or more, and some companies include "escalator clauses" that increase the payments by a small percentage each year.
