

# Photovoltaic panel sales and transfer process

Should you transfer ownership of solar panels during a home sale?

Transferring ownership of solar panels during a home sale, though intricate, can lead to a win-win situation for both parties. By carefully navigating ownership structures, legalities, and buyer expectations, homeowners can ensure a smooth transition and enhance the marketability of their solar-powered property.

Do solar panels increase the value of a home?

While solar panels can increase the market value of a home, their impact varies by region, local utility rates, and the structure of ownership. In areas with high energy costs, the premium for solar homes tends to be higher. In Denver and Colorado Springs, energy costs are increasing, making solar a great option to explore.

Are all solar panels created equal?

Not all solar panels are created equal, and neither are their ownership models. The type of solar agreement in place can significantly influence the ease or complexity of transferring ownership during a home sale. If the homeowner has fully paid for their solar system, the transfer process is relatively straightforward.

Does Tesla transfer a solar agreement to a new owner?

When Tesla customers sell their homes, we transfer the solar agreement to the new owner ~98% of the time. In a small number of cases our customers elect other options as outlined in their agreement. When should I initiate the home sale process with Tesla? The home sale process should be initiated as soon as you are in contract with a buyer.

Should you buy or lease solar panels?

If the homeowner has fully paid for their solar system, the transfer process is relatively straightforward. Fully owned panels increase the value of the home without any ongoing financial obligation for the new owner. Leased panels, on the other hand, introduce some complexity.

Should you buy or sell a solar system?

Selling and buying properties require a detail-oriented approach, especially for homebuyers who need to compare home facilities with the suggested price. When it comes to selling your house, owning a solar system is merit. Here is what recent studies show. Real estates with solar systems have higher and faster buying rates than those without.

Here's 3 easy steps to follow and how we recommend transferring your solar services to the new homeowner when you sell your home and move to a new location. Reach out to our solar experts for more information.
