Monocrystalline solar panels are the most cost-effective option. Perovskite panels are more efficient and will be on the market soon . Thin film panels are the cheapest, most versatile choice. It's confusing enough trying to find solar panel prices, never mind choosing between the different types of solar panels to pick the right one for your home.

Pairing a commercial solar panel system with a battery storage solution is an excellent strategy to maximise the energy savings generated by your solar panels. By storing and utilising all the free electricity produced, rather than exporting it back to the grid, your business can achieve even more significant savings.

Custom Solar Panel Shapes Use Space Less Efficiently. We are happy to make custom-shaped solar panels, but they will be more expensive per Watt and generate less power per area than rectangular panels. First, the cells on a non-rectangular panel will cover a lower percentage of the available surface area.
