So in order to get the desired formatting, you have to bind to a number. not a string. If you think a little, there is a reason behind that: the formatting like digit grouping is only interesting for numbers and not to generic strings like "helloworld". So noone cared about implementing such formats for generic string. Sorry for that.

4. Tap on "Manage Phone Numbers", then "Add phone number". 5. You will be prompted to enter your country and desired phone number type (mobile, home, work). 6. Once you"ve entered the necessary information, click on "Generate" to create a temporary phone number. Remember, the temporary phone number will only be valid for a limited period.

If $b(G) >= r$, then G is said to be r-binding. Several theorems use the binding number of a graph to give a sufficient condition for a graph to have some properties. As one of the earliest results in binding number study, Woodall [16] showed graphs with $b(G) >= 3\ 2$ have a Hamiltonian cycle.

I"d like to make sure that the number is exactly 10 digits, no letters, hyphens or parens and that the first two digits do not start with 0 or 1. Can someone help out? regex; Share. Improve this question. Follow edited Dec 8, 2011 at 19:07. jefflunt. 33.9k 7 7 gold ...

I opened a bank account under a new passport number and couldn"t link it to WeChat because the two passport numbers didn"t match. It"s true that WeChat won"t let you change your passport number within the app. For this, there is a solution: Follow Tencent"s customer service account on WeChat: ???? (tengxun kefu).
