Solar array mounted on a rooftop. A solar panel is a device that converts sunlight into electricity by using photovoltaic (PV) cells. PV cells are made of materials that produce excited electrons when exposed to light. The electrons flow through a circuit and produce direct current (DC) electricity, which can be used to power various devices or be stored in batteries.

November Solar News: China's reduction in photovoltaic export tax rebates may lead to an increase in module prices, with current solar panel prices in Europe below 6 cents per watt. France plans to install about 1.35 GW of solar ...
