For example, in 2010, a PV power station in Xuzhou, China, undergone induced lightning intrusion, resulting in the destruction of control system of single-axis tracking unit. In 2016, a PV power generation system in Xizang, China, was stroked by lightning, leading to obvious lightning stripes on some of the PV panels.

In terms of power station investment, we should consider the cost and benefit factors of the power station, whether to choose photovoltaic intelligent tracking bracket or fixed bracket. If the construction needs to increase the site cost by 20%, it is necessary to ensure that the capacity increase is higher than 30%, so that the tracking system will have considerable ...
