Do rooftop solar systems need energy storage?

Energy storage solutions: As rooftop solar systems continue to grow in popularity, the need for energy storage becomes more critical. Batteries like the Tesla Powerwall offer residential users the ability to store excess solar energy produced during the day for use in the evening when the sun is no longer shining.

Why should I install a rooftop solar system?

Installing a rooftop solar system reduces energy bills, promotes environmental sustainability, increases property value, and enhances energy independence. These advantages encourage individuals to use clean, renewable energy to lower their carbon footprint. Is my roof suitable for a rooftop solar system installation?

Are rooftop solar panels or battery energy storage systems worth the cost?

Pacific Northwest National Laboratory (PNNL) researchers are here to help. Homeowners must navigate a quagmire of complicated policies to determine whether the energy savings from rooftop solar panels or battery energy storage systems (BESS) are worth the high upfront cost.

What is a rooftop solar energy system?

Rooftop solar energy systems produce power locally, keeping power production and the economic opportunities that solar energy generates within the community. SETO funds research that helps maximize the value of rooftop solar systems for their owners.

How do you maintain a rooftop solar system?

The maintenance of rooftop solar systems primarily involves cleaning the solar panels and inspecting the entire installation for damage or wear. Solar panels need regular cleaning to remove dirt, dust, and other debris such as bird droppings that can accumulate on their surfaces.

Are rooftop solar and battery energy storage a barrier to adoption?

Even with the benefits of rooftop solar and battery energy storage, the upfront cost of these systems is still a barrier to adoption. In some cases, especially for BESS, the time it takes for a homeowner to recoup the cost of the system with energy savings is longer than the lifetime of the technology itself.
