

# San diego energy storage

How do I contact San Diego's Battery energy storage systems project?

General Inquiries: Planning & Development Services PDS.LongRangePlanning@sdcounty.ca.gov |(858) 505-6677 Learn more about the County of San Diego's Battery Energy Storage Systems Project.

Will San Diego pause applications for future battery energy storage projects?

Wednesday's motion also proposed issuing a pause on any new applications for future battery projects until standards are adopted. The San Diego County Board of Supervisors has directed staff to establish standards for approving future battery energy storage projects in the unincorporated areas of the county. (Rob Nikolewski/San Diego Union-Tribune)

What are energy storage projects?

Energy storage projects support grid reliability and the integration of more clean energy into the electric grid. Enables the California Independent System Operator (CAISO) to dispatch energy from our batteries at any time to help balance supply and demand on the statewide grid.

Where should battery energy storage systems be located?

Going into Wednesday's meeting, Desmond called for regulations that, "at minimum," make sure battery energy storage systems avoid being located in residential areas or near schools, day care centers, senior living facilities and hospitals.

How has energy storage technology changed over the years?

The energy storage technology being deployed today looks and operates very differently from the technology installed just three to five years ago. The industry has also developed a much deeper understanding of the technical and safety management of thermal hazards.
