Solar energy comes from the limitless power source that is the sun. It is a clean, inexpensive, renewable resource that can be harnessed virtually everywhere. Any point where sunlight hits the Earth's surface has the potential to generate solar power. Unlike fossil fuels, solar power is renewable. Solar power is renewable by nature.

Solar panels installed on rooftops take advantage of the sun's energy and convert it into a usable energy source. Solar panels are sometimes called PV (photovoltaic) solar power systems. Home installations of high-quality solar systems can drastically cut or eliminate dependence on the electric company by powering most of your household needs.

Great North Power Solutions is a South African based company that distributes and maintains power generation equipment and solar systems.
