

Solar roof support packaging

What is GB-Sol's roof integrated solar PV system?

GB-Sol's roof integrated solar PV system enables full-sized, high efficiency solar panels to be discreetly fitted within any type of conventional roofing material. Our Projects team manage complex solar PV projects such as large commercial buildings, industrial environments and social housing retrofit programmes.

How good is a rooftop solar PV array?

A rooftop solar PV array is only as good as the mounts and rails it sits upon. Below we have the latest updates from 16 manufacturers across residential and commercial & industrial solar mounting systems, and approaches vary greatly.

What types of solar panel mounting systems are available?

The manufacturers we provide are designed to offer reliable solar panel mounting structures for residential, commercial, and utility-scale projects. There are solutions available for flat roofs, pitched roofs, ground mounted and roof flashings. Solar mounting systems provide the structural support needed to sustain solar panels.

What is a PV slate roof?

Upgrade your roof with PV Slate and experience the seamless blend of traditional slate aesthetics and powerful solar energy- all backed by a 25-year warranty. The Infinity solar roof is an almost seamless glass and aluminium roof covering from ridge to gutter and side to side, with huge solar power output and a 25 year warranty.

What type of roof mounting system is suitable for a residential roof?

A straightforward system designed for portrait and landscape orientation, SolarRoof(TM) Pro is suitable for most residential roof applications. A universal roof mounting system, SolarRoof(TM) Pro is suitable for most roofs and compatible with most of the framed Solar PV modules on the market.

What is a GB-Sol Infinity Solar Roof?

The Infinity solar roof is an almost seamless glass and aluminium roof covering from ridge to gutter and side to side, with huge solar power output and a 25 year warranty. GB-Sol's roof integrated solar PV system enables full-sized, high efficiency solar panels to be discreetly fitted within any type of conventional roofing material.
