Why do we need solar auctions?

Regular solar auctions are needed to send a clear signal to investment markets and to better align with the rapid pace of solar development. Robust budget and capacity caps for Pot 1: It is the association's view that there should be no need for a capacity cap for Pot 1 technologies.

What is the UK's 'green energy support scheme'?

This was published under the 2019 to 2022 Johnson Conservative government. The biggest ever round of the UK government's flagship renewable energy support scheme is opening to applications today (Monday, 13 December), with £285 million available a year for building the next generation of Great Britain's green energy projects.

Should co-located solar and storage projects be considered eligible technology?

Increased access for co-located solar and storage: Promoting co-located projects via CfDs could have system wide benefits, as well as those which flow directly to the developer and consumers. Defining co-located solar and storage projects as an eligible technology would remove a major barrier for storage in accessing CfDs.
