

Starting salary in the energy storage industry

How much do energy jobs pay per hour?

Regardless of the relatively small differences between sectors, an important point is that all energy jobs pay well above the national average of \$19 per hour, and the non-extractive sectors are growing swiftly. The future of extractive industries' employment is much less certain.

What makes the energy storage industry so interesting?

The energy storage industry is still fairly young compared to others like wind or solar. This means it's rapidly growing, changing and innovating (part of what makes working in the industry so interesting).

Why is the energy industry focusing on high-paying jobs?

As the U.S. economy recovers from the COVID-induced recession, the emphasis is shifting away from the simplified metric of the number of jobs, toward a focus on high-quality, high-paying jobs. As some service sectors languish with unfilled positions and shorthanded staffing, the energy industry pays premium wages.

What makes field a great energy storage company?

The energy storage industry is no exception. At Field, they are the glue that holds us together - whether that's by bringing new talent into the business, negotiating contracts or ensuring we have a strong balance sheet. They're absolutely essential to the Field business, enabling us to do the work we do.
