How many BCM of natural gas is transported to Armenia and Georgia?

In 2019, the pipeline transported 1.94 bcm of natural gas to Armenia and 0.17 bcm to Georgia. Georgia's internal market receives gas through the East-West and North-South Main Gas Pipeline systems, consisting of the Kazbegi, Kakheti, Southern, Ajara and Poti branches.

How do gas imports reach Georgia from Azerbaijan?

More gas imports reach Georgia from Azerbaijan by way of the South Caucasus Pipeline (SCP), which transports gas from the Shah Deniz field parallel to the route of the Baku-Tbilisi-Ceyhan (BTC) crude oil pipeline from Azerbaijan through Georgia to Turkey.

Is Tbilisi a republic or a state?

Tbilisi is Georgia's capital and largest city, and the country covers a territory of 69 700 square kilometres (km<sup>2</sup>) with a population of 3.7 million. It is a unitary semi-presidential republic, with the government elected through a system of representative democracy.

Why do we need a co-optimized energy storage system?

The need to co-optimize storage with other elements of the electricity system, coupled with uncertain climate change impacts on demand and supply, necessitate advances in analytical tools to reliably and efficiently plan, operate, and regulate power systems of the future.

What is Georgia's final energy consumption?

Georgia's final energy consumption was 4.49 Mtoe in 2020. From 2000 to 2020, both final energy demand and electricity consumption per capita more than doubled, and are very close to global averages. The final energy mix is relatively diverse compared with other countries in the region.
