

The roof with photovoltaic panels installed is leaking

What causes roof leaks after solar panel installation?

Improper installation is one of the primary causes of roof leaks after installing solar panels. If the solar panels are not securely attached or if the mounting brackets are not correctly positioned, water can seep into the gaps and result in leaks.

Is it the solar panels that are leaking?

If solar panels are not ideally suited for your roof, poor installation tactics can make your roof leak. Roofs made from wood shingles, clay, slate, and terracotta tiles are particularly vulnerable to leaks and damage during installation.

Can you fix a roof leak under solar panels?

When faced with a roof leak under your solar panels, it's important to take immediate action to prevent further damage to your roof and home. Fixing a roof leak under solar panels requires careful attention to safety precautions and following the proper steps to resolve the issue.

Do solar panels damage your roof?

While solar panels themselves will not inherently damage your roof, an improper installation can lead to problems down the line. It is crucial to ensure that the installation is done correctly by a professional, or with thorough research and proper planning if you choose to do it yourself.

Can solar panels be installed on a shingle roof?

Solar panels can be installed on shingle roofs, but some shingle materials may not be as compatible and may require additional consideration during installation. If the roof is not ideal for solar panels, poor installation tactics are more likely to make it leak.

What causes a roof leak?

There could be any number of causes for a leak, including damage caused by walking on the roof, dragging solar panels, or having a tile break in the underlayment. These are not issues you can resolve yourself, and since your warranty would cover these issues, your first call should be to your installer.
