Product Description. Product Features. The newly designed U.S. Solid USS-BSW00005 high-frequency inversion battery spot welder equips with the two super capacitors for energy storage and power supply for pulse welding. Unlike traditional AC transformer spot welders, it is more portable and it does not cause any interference to the electric circuit, eliminating tripping ...

3.3 Select Welding Parameter As the welding is performed by discharge of capacitors, the welding time is very short, only several milliseconds, so the welding time is designed and there is no need to adjust it. Just adjust the charge voltage is ok. Generally, the bigger the stud diameter is, the more energy is needed, as well as the charge voltage.

Energy-storage type stud welding machine can weld stud, threaded stud, dowel to metal workpiece. During the welding process, through element point discharge energy storage capacitor discharge, discharge time, 0.001 to 0.003 seconds. Don't need gas or ceramic ring protection, penetration is about 0.1 MM. This method is applicable to the thickness of more than 0.4 mm ...
