

# What do women do in photovoltaic panel installation projects

Are women in the solar PV workforce?

The analysis outlines the share of women in the solar PV workforce, examines the barriers that women face in the sector - including women living and working in the off-grid context - and discusses the path to a more diverse solar PV workforce. See the visual story: [A Gender Perspective on Solar Employment](#).

What role do women play in the solar PV industry?

Additionally, there is a wide space for women to take over more decision-making positions, as they currently hold 30% of managerial jobs and barely 13% of senior management posts in the solar PV industry.

What jobs do women have in solar PV?

Driven in part by off-grid solar PV deployments, women account for 35% of other non-technical positions such as marketing, sales, distribution, and product assembly and installation.

How can we build a diverse and inclusive solar industry?

We're working to build a diverse, equitable and inclusive solar industry by providing pathways to technical careers for women\*, highlighting the voices of women of color in the industry, and providing national leadership on solar workforce diversity.

Who can participate in the women in solar program?

\*People who identify as non-binary genders and feel they belong in our community of cis and trans women are invited to participate in our Women in Solar Program.

Does the solar industry need a gender lens?

The solar photovoltaic (PV) industry is the largest employer within the renewable energy sector, accounting for some 4.3 million jobs. If the solar business does not include a gender lens to incorporate more women, the industry is at risk of excluding a talent pool that is integral to its growth.

In recent years, Spain has experienced a significant boom in the solar energy sector, becoming a benchmark in Europe. This growth has led to a growing interest on the part of individuals and ...

Not only do women rule the economy, but they are also the group responsible for the majority of solar installations in the United States. In 90% of American homes, women are involved in or make the decision to buy ...

Documenting a Decade of PV Cost Declines (2021) Tutorial. Watch this video tutorial to learn how NREL analysts use a bottom-up methodology to model all system and project development costs for different PV systems. It's Part 3 of ...
