ABOUT CLEANWIND. Cleanwind is an experienced company formed to meet the demand for experienced technicians in the Wind industry. Our key figures have worked in the wind turbine industry for many years building a vast experience in operation and maintenance of Windfarms and have a proven track record of working with major utilities.

And with this growth, there is an increased demand for qualified blade repair services on existing wind turbines across the UK and mainland Europe. We can conduct visual inspections of turbine blades to assess their damage levels and provide at height rope access teams to conduct the necessary wind turbine blade repairs.

Utilising a variety of access techniques for blade repair, GEV Wind Power are able to provide a quality service in the repair of all aspects of damage to the wind turbine blades. Our delivery portfolio includes traditional rope access solutions, as well as platform access methods, allowing GEV Wind Power to provide cost effective blade repair scopes globally.

Used by OEMs worldwide, our maintenance solutions are integral to ensuring the best possible functioning and maximum performance of a wind turbine's lifespan. Through the installation of retrofits and upgrades, our offering has expanded to upgrading the core turbine, rotor and blade components, including: Lightning Protection Systems

Our highly specialised and experienced teams of certified wind turbine technicians are a fast, cost-efficient solution for a range of wind turbine maintenance activities. As a leading wind turbine maintenance service provider, you can expect to see our teams working on various onshore wind farms annually across the UK and Ireland.

Gropeli is a wind turbine repair company based in Fort Worth, Texas. Our highly-skilled blade technicians have been a part of the blade composite industry since 2006. Since then, we have been supporting and satisfying the needs of our customers across multiple continents.
