

Fuel cell system and vehicle control technology; New energy electric vehicle control and optimization; Li-ion power battery state estimation and full life cycle management; On-board thermoelectric ...

Jingguang Tang's 11 research works with 25 citations and 147 reads, including: Study of Resistive SFCLs for Transient Stability Enhancement of Paralleled Synchronous and Virtual Synchronous ...

Building multiple microgrid (multi-MG) clusters is conducive to accessing high penetration of renewable generations, consuming electric energies locally, and reducing operating losses.

Ming-Feng Ge (IEEE Senior Member) is currently a Professor in the School of Mechanical Engineering and Electronic Information, as well as the head of Department of Mechanical Engineering, China ...

Hongkun Chen's 104 research works with 957 citations and 5,312 reads, including: Investigation of active voltage support control approach of DC distribution networks based on virtual inertia ...
